

## Some information for the start into the New Year

Dear members

Within the last few weeks I have been asked several times what has happened to our „dream“ of Himmelried. This is why I would like to give you some information with this short mail.

We have not been able to keep you informed by further newsletters, as our new president of the association, Beatrice Zurbrügg, fell ill and has been able to fulfil only her most important duties. She would have loved to do more for our members, but she had to undergo some surgery now and she must recover from that before she can go on working again. But even though she was in hospital, the New Years greetings came from her!

Within the last months we have went on working on the project Himmelried. There were mainly problems about the financial situation, as the house is quite expensive. There are not only the costs of buying the property, but also of renovation and especially making it accessible for handicapped people. The house must be suitable for wheelchairs, which needs a lot of money, also for an escalator, so it can be used by all members. We do not want to diminish the money off he association, but were searching for other possibilities for the purchase off he property. Now we have found them. But we still need generous donations of our members to do all the changes within the house.

In January 2016 we will send you a letter in which we will ask you to donate, and in which you will get some more information. Our project Himmelried, as an oasis of life and at the same time of saying good bye, is on a good way to realization.

In this way I do wish all our members all the best for 2016, for the project Himmelried a good start, but mainly and before all, good recovery to our president Beatrice Zurbrügg and to all suffering members.

your vice president

Mrs Dr. med. Erika Preisig
